St. Lino Science High School Manila	Sampaloc,
Science, Technology, Engineering and Mathematics (STEM) Track	2016-2022
Honors & Leadership: Graduated with Honors	

PROJECT

SinTRACK: An IT Asset Inventory Management and Request System With Predictive Analytics for Decision Support

- Developed a centralized web platform for the Information Communications and Technology Office (ICTO) of the Polytechnic University of the Philippines for our capstone project. The system was created to assist with the university's Information Systems Strategic Plan (ISSP) conferences, reducing human errors and time-consuming manual cross-checking of office inventories and historical requests. The system was developed using C#, Tailwind, JavaScript, and MS SQL, with the predictive model utilizing ML.NET's FastTree library.

SKILLS & INTERESTS

Core Skills: Intuition, problem-solving, flexibility, cooperation.

Technical: Programming (C#, Java, Python), Machine Learning (FastTree), Agile Development, Microsoft Office

Language: English, Filipino

Interests: Learning experiences, Data Science, Machine Learning, Backend development.
